 HYLWO.WHI-PVC-WB \$246.86

PVC Drain for Freestanding Tubs
 FLDRAINFC-T-PVC-18 \$122.98

A fast and easy way to install a freestanding tub with less installation time. It is ideal for tight spaces with minimum access and allows easy access for repairs.

Features:

- One piece drain and no metal = no rust
- Union reduced from 2" to 1-1/2"
- Light weight
- Includes test plug and plumbing grease
- The middle cap can be removed to replace the silicone gasket
- The narrow drain base allows for an installation closer to the stud
- The drain is 2-3/4" thick to allow for installations on smaller rafters

Please Note:

Due to the sloped design of the edges on this tub, the tracks for 6mm and 8mm thick glass bypass doors will fit fully on the lip of the tub. The 10mm Gemini door track will overhang slightly as seen in this photo below. The overhang should be on the interior side of the tub.
