

FCPS "F.A.T.E" PARTNERSHIP WITH MOSAIC

What is F.A.T.E?

F.A.T.E., the Foundation for Applied Technical Education, Inc. came to fruition when Fairfax County Public Schools (FCPS) was searching for a comprehensive educational program that would equip high school students with in-demand trade and technical skills. The goal is to ensure a successful transition into the workplace.

Since the start of F.A.T.E in 1971, the program's objectives have progressed leaps and bounds by empowering students with employable occupational skills across numerous industry trades. Thanks to an influx of support from a wide range of businesses and other professional organizations (including Mosaic Home Interiors), F.A.T.E acquired resources and career opportunities for students to take advantage of through their Career and Technical Education programs.

The Spring Village Project

Located in Springfield, Virginia, the Spring Village Residential Site is a community-based construction technologies program that provides students with the opportunity to apply their classroom learned skills on-site directly with new homes under construction. Students work closely with professional sub-contractors in various trades and gain invaluable construction industry experience.

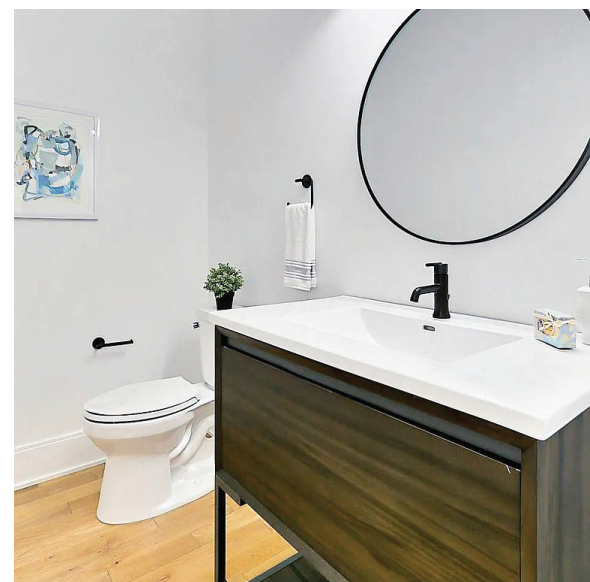

As a proud partner of F.A.T.E, Mosaic Home Interiors supplied tile, vanities, lighting, and other products for Lot 12. The tile and MHI was curated by Design Consultant Julian Branco (AX11), with Alpha Ceramic Tile overseeing the installation. Mosaic Home Interiors is honored to have taken part of such a rewarding experience with the F.A.T.E program and looks forward to collaborating on future projects.
